ABOUT US

Established in 1979, **Awnmaster** has been a trusted name in quality shade and structural solutions for nearly fifty years. In December 2019, the company was acquired by **Dean Matheson** and **Kevin Schuman**, who officially took over operations in April 2020. Their leadership, along with **Operations Director David Ferreira** who joined in 2021, has driven continued growth and innovation across the business.

Today, **Awnmaster** offers an expanded range of products including awnings, blinds, sun decking, aluminium windows and doors, artificial grass, and both steel and frameless balustrades. Every installation is custom-designed to suit the client's specific requirements, ensuring practical, durable, and visually appealing results for domestic, industrial, and commercial applications.

Committed to delivering value for money without compromising on quality, **Awnmaster** proudly continues its legacy of reliability, craftsmanship, and exceptional service.

AWNINGS

Awnings that are high quality and all-aluminium. They are lightweight and require very little maintenance.

Ventalok's high strength-to-weight ratio and advanced design features make for simplicity and ease of installation. **Ventalok** is available in a range of sixteen different colours. You can choose from multiple combinations to suit your requirements as the colours can interchange in the candy stripe panels, with a variety of available profiles.

These include the **Caribbean** (curved), **Majorca** (wedge), **Capri** (angular) and other purpose-made designs.

MASTERPORTS

Spending a hot summer afternoon at home is always a great feeling, especially if you have everything you need to enjoy your surroundings.

With so many different options available, there are many ways to transform your home into the perfect environment in which to relax with friends during summer.

LOUVRES

This is the domestic range of products manufactured by **Hulamin**, South Africa. Following extensive research and development, **Hulamin** started manufacturing the Sun-Adjust patio cover in 1993.

A close work association with **Hulamin** has enabled Awnmaster to implement their technical knowledge in installations, with Sun-Adjust patio covers achieving high popularity in the marketplace.

SHADEPORTS

Our Shadeports are extremely adaptable and include a number of applications– carports, awnings, walkways, recreation covers, sandpit covers, screens and more.

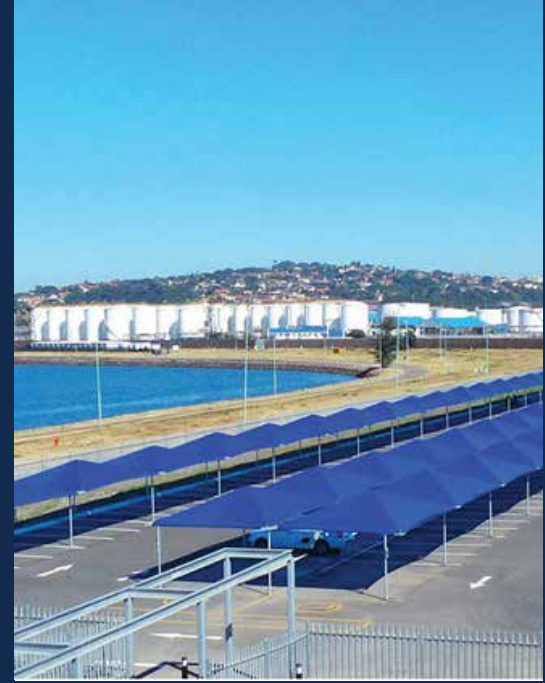

Our UV Ultrablock shade cloth provides up to 96% shade, full protection against hail and partial dryness in light rain. A fully waterproof netting is also available. Awnmaster's Shadeport designs have been internationally accepted and are currently being exported.

Due to their modular design, the packaging and assembling thereof is done with relative ease.
